

FIBERGLASS RIVER WALL SYSTEMS

- Fast installation
- Stronger than steel or concrete
- Long life and low maintenance
- No tile or grout maintenance
- Smooth durable plexiglass acrylic finish
- Non-abrasive finish prolongs tube life
- Time tested and proven in all climates
- No concrete backfill needed behind fiberglass wall
- Integrated flow control panels and skim chambers
- Weatherflex coping allows the deck to move independently from the fiberglass wall
- Simply caulk and join the modular panels to form any shape and size
- Rigid for straight walls or flexible for free form designs
- Flanged and predrilled for easy assembly
- Made in the USA
